CAPS AND STOPPERS

Made of polyethylene

Plug type push-in caps and 2-position snap caps are made of polyethylene for test tubes with outside diameters from 12 to 17 mm. Dual position caps offer two possibilities: the closed but unsealed position where samples are maintained aerobic for microbiological procedures; and the fully sealed position where the cap is pushed tight to seal the tube for anaerobic use or for storage, transfer and centrifuge applications. 17 mm plug type caps (Series T401-10 on page 82) are also for use with the **Simport** 15 ml centrifuge tube series T408. Packed in a bag of 1000 caps.

VACUCAP™ TUBE CLOSURES

Made of polyethylene

An economical way to recap blood drawing tubes, disposable glass test tubes and plastic culture tubes. Flexible VACUCAP™ closures protect from aerosols of highly infectious microorganisms. They guard samples against cross-contamination and laboratory work areas against infection and spillage. Precision molded from low-density polyethylene, with a double-flanged seal, VACUCAP™ clamps firmly on the tube. VACUCAP™ holds fast under most rigorous procedures, including centrifugation. Not suitable for autoclaving.

Designed for easy-on, easy-off use, due to the exclusive Dual Thumb Tab. Cap removal is simple and quick. VACUCAP™ closure is ideal for recapping most 13 mm, OD and 16 mm evacuated glass blood collection tubes. 13 mm style can also be used on most 12 mm plastic test tubes.

Seven colors give you at-a-glance sample identification and enable you to match original stopper color.

Packed in a bag of 1000 caps.
